

How to set up the R tutorials

SRH

2026-08-20

I do not have R or R Studio installed, and I don't need them.

Option 1: Load the tutorial on “Posit Connect Cloud”

Go to [Introduction to R](#). or [Statistical Methods for RCTs](#).

Option 2: Use the cloud version of R Studio.

- Go to <https://login.posit.cloud/>.
- Register with your email address;
- Select the “Free Cloud” subscription option;
- Go to your workspace and click on New Project (top right corner), then choose New RStudio Project.
- Upload the document `IntroR.Rmd` or `RCTMethods.Rmd`. In the bottom right panel, find the option to “Upload File”.
- Open the document and hit “Run Document”.
 - R may ask you to install packages. If so, click ok.
 - The browser may ask if pop-ups are allowed. If so, click ok.

I do not have R or R Studio installed, and I don't mind installing them.

- Download and install R: Go to <https://stat.ethz.ch/CRAN/> and choose the option for your operating system.
- Download and install R Studio: Go to <https://docs.posit.co/ide/user/>, and choose the option for your operating system.
- Open the document `IntroR.Rmd` or `RCTMethods.Rmd`.
- R may ask you to install packages. If so, click ok.
- Open the document and hit “Run Document”.

I have R and R Studio installed.

- Open the document `IntroR.Rmd` or `RCTMethods.Rmd`.
- R may ask you to install packages. If so, click ok.
- Open the document and hit “Run Document”.
